### **FACTUAL BACKGROUND**

13. Because of the natural oil content in tar sand, the inclusion of tar sand in asphalt presents a cost-effective alternative to traditional hot asphalt, which requires substantial quantities of expensive, refined asphalt oil / liquid asphalt cement.

14. Gilman (“Gil”) N. Mitchell and his father, Ned B. Mitchell, (the “Inventors”) were in the business of manufacturing and installing asphalt road products in the Uintah County area and invented compositions and processes relating to asphalt road paving using tar sand (also known as, among other things, “oil sands”).

15. The Inventors’ innovative compositions and processes made the incorporation of the readily available and abundant tar sands into the hot asphalt manufacture and installation relatively simple and much less expensive than traditional methods.

16. The Inventors’ innovative compositions and processes relating to asphalt road paving using tar sands are protected by, for example, U.S. Patent No. RE39,289 (“289 Patent”), a copy of which is attached as Exhibit A.

17. Uintah County along with the Uintah Transportation Special Service District (the “District”) adopted and submitted to funding authorities a plan for the paving of county roads utilizing processed native tar sands, a locally-abundant, naturally-occurring, carbon-based material, as the paving material.

18. The Inventors presented their patented process to the District after which the Inventors’ patented compositions and processes became widely known, in particular among the Inventors’ competitors.

Burdick actively marketed the products and services of Burdick Paving by working with private and governmental agents and preparing and placing bids for contracts based on the planned use of the patented compositions and processes of the '289 Patent.

Ken Burdick personally and knowingly engaged in the manufacture and use of the Inventors' patented compositions and processes covered by the '289 Patent.

29. AAT alleges on information and belief that Ken Burdick actively participated in and assisted in implementing operations at Burdick Paving that infringed the '289 Patent.

30. AAT alleges on information and belief that Kerry Farnsworth acted as Burdick Paving's engineer and applied the teachings of the '289 Patent to fully adopt the manufacture and use of the subject matter claimed in the '289 Patent.

31. AAT alleges on information and belief that Kerry Farnsworth actively participated in and assisted in implementing operations at Burdick Paving that infringed the '289 Patent.

32. AAT alleges on information and belief that Kerry Farnsworth actively participated in the acquisition and configuration of asphalt-production equipment for the purpose of making and using the claimed subject matter of the '289 Patent.

financial advantages of their willful infringement, Burdick and its owners undertook continued efforts to direct Staker's asphalt production to include the claims of the '289 patent in order to evidence the financial basis presented in the buyout.
